SAFETY BREAKDOWN TRIANGLE KIT, 3 PIECE

Double-sided triangular reflectors to warn other road users that your vehicle has stopped, has broken down or the load has fallen onto the road. Reflectors include weighted base and stabiliser legs to ensure product can be used in high winds.

NOTE that a vehicle, or a vehicle and trailer, with a GVM of more than 12 tonnes, must carry **3 portable warning triangles** for use if the vehicle breaks down. If a vehicle required to carry warning triangles stops, or the load being carried by the vehicle falls onto the road and is not visible for 200m in all directions, the driver must put:

- the first triangle 50-150m from the front of the vehicle or fallen load
- the second triangle 50-150m from the rear of the vehicle or fallen load
- the third triangle at the side of the vehicle or fallen load, in a position that gives sufficient warning to other road users of the position of the vehicle or fallen load

Features & Benefits:

- Triangular reflectors for day and night visibility to maximise safety for oncoming traffic and vehicle operator
- Fluorescent inner triangle provides visibility to daytime traffic
- Heavy duty construction with weighted base for stability in high winds
- Portable with no-skid rubber feet
- Quick and easy set-up, folds flat when not in use
- Includes handy carry case
